

Audio Quality Survey

(EBIT Faculty – Final Year Project)

For each of the following songs, can you differentiate between the unmodified audio file and the audio file which included the secret message? On a scale from 1-5, rate the following audio files by marking your choice by a cross (X). A rating of 1 means that the difference between the two files is clear and a rating of 5 means that there is no audible difference between the two audio files.
